Workflow Exploration Report

Testautomations User Scenario

Website: <https://testautomationpractice.blogspot.com>

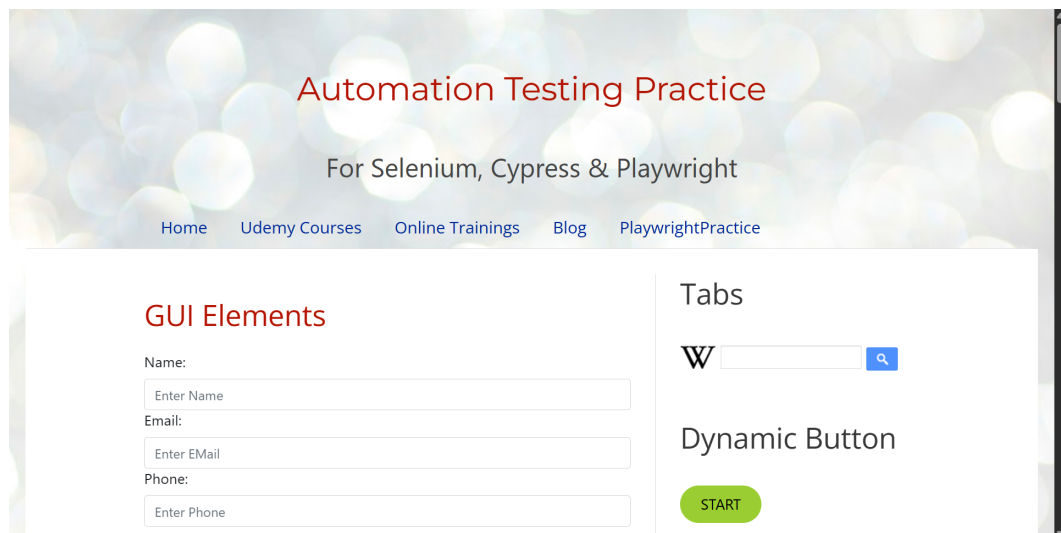

Feature Area: Downloads

Goal: Testautomations User Scenario

Generated: May 25, 2026 at 12:15 PM

Confidence: 95%

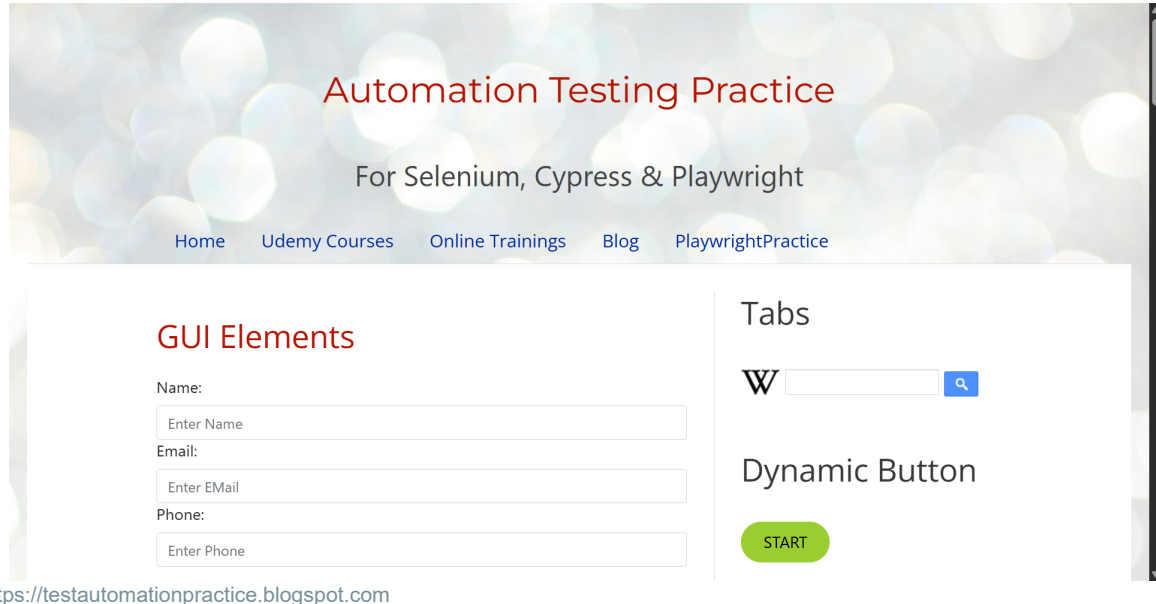

The AI successfully executed an end-to-end workflow to test the file download feature on the Testautomation Practice site. It navigated from the homepage through relevant sections, generated both text and PDF files, and verified that downloads were initiated and completed. This demonstrates robust automation coverage for the Downloads feature area.

Step-by-Step Walkthrough

1. Homepage Loaded

The AI navigates to the Testautomation Practice homepage, confirming the site is accessible and ready for testing.

The screenshot shows the homepage of 'Automation Testing Practice'. The header features the title 'Automation Testing Practice' in red, followed by the subtitle 'For Selenium, Cypress & Playwright'. A navigation bar includes links for 'Home', 'Udemy Courses', 'Online Trainings', 'Blog', and 'PlaywrightPractice'. The main content area is divided into two columns. The left column, titled 'GUI Elements', contains a form with fields for 'Name:', 'Email:', and 'Phone:', each with a placeholder text 'Enter [field name]'. The right column, titled 'Tabs', contains a search bar with a 'W' icon and a 'Dynamic Button' labeled 'START'. The URL 'https://testautomationpractice.blogspot.com' is visible at the bottom.

2. Access Download Files Section

The AI enters the Download Files section, preparing to test file generation and download functionality.

The screenshot shows the 'Download Files' section of the website. The header is identical to the homepage. The main content area is divided into two columns. The left column, titled 'Download Files', contains a section 'Download a Text or PDF File' with a text input field labeled 'Enter Text:' and a button labeled 'Generate and Download Text File'. The right column, titled 'Tabs', contains a search bar with a 'W' icon and a 'Dynamic Button' labeled 'START'. The URL 'https://testautomationpractice.blogspot.com/2018/09/automation-form.html' is visible at the bottom.

Discovered Workflow: e2e_business_workflow - Complete User Journey

Comprehensive test covering the download file workflow from homepage navigation to download verification.

A QA engineer navigates from the homepage to the GUI Elements section, accesses the Download Files area, generates and downloads both text and PDF files, and verifies download completion. All steps are mapped to actual agent execution and selectors.

- Use `waitForSelector` for each navigation and download initiation.
- Verify download completion by checking for blob URL and file presence.
- Handle tab switch for download verification.
- Ensure all selectors are used as captured, including alternatives.
